

Sage Journey

About

Sage Journey is a care company that prides itself on providing medicine from the heart. At Sage Journey, all clients will receive a personally catered care plan that will respect culture, language, and the freedom to choose. Person first is the stance at Sage Journey, and staff will always ensure clients are able to participate in their culture, language, and religion. Each client will be treated with respect and dignity in all levels of care.

We recognize that everyone who comes to us is their own person, with their own histories, languages, and experiences; Sage Journey will not only respect each person for who they are, but work to foster individuals' sense of self throughout the process of aging. Staff have extensive experience working with clients of all backgrounds and are well versed in dementia care and end of life care. We seek to ensure that everyone can age gracefully and with dignity.

Vision

Sage Journey will provide inclusive care to *all* seniors in need (regardless of race, religion, or creed) by working with caregivers and staff to create and implement individualized care plans. We believe in the individual's right to speak freely in their preferred language, respect for treaty land, and medicine from the heart.

Mission

Sage Journey exists to provide all levels of care for seniors in need. We will provide personal, emotional, and spiritual supports based on individualized care plans that cater to the clients' specific needs and cultural background. Sage Journey will work with clients to ensure their preferences are catered to, whether language, spirituality, or culture; we are here for each client as an individual.

Values

Sage Journey operates by the following principles:

Dignity

Ensuring all clients are respected and cared for while preserving their dignity and encouraging active choice

Inclusiveness

Working with clients of diverse backgrounds and providing personalized care while supporting clients' cultural needs

Integrity

Preserving each and every clients' integrity and right to choose through personalized care
